

Weather App Documentation

Student Details

Name: Mekanaboyina Suma Harshitha

Project: Weather App

Technologies: HTML5, CSS3, JavaScript, OpenWeatherMap API

Introduction

Responsive weather application that fetches real-time weather data using an API.

Objectives

Build a responsive app, integrate an API, and display live weather information.

Features

City search, real-time temperature, humidity, wind speed, weather icons, responsive UI.

Project Structure

index.html, style.css, script.js, images/, README.md

Learning Outcomes

API integration, Fetch API, DOM manipulation, responsive design.

Future Enhancements

5-day forecast, current location weather, dark mode.

Conclusion

Successfully demonstrates frontend development with API integration.
